

Syllabus

for course at first level

Consumption, Culture and Commerce
Konsumtion, kultur och kommers

7.5 Higher Education
Credits
7.5 ECTS credits

Course code:	PR2543
Valid from:	Autumn 2020
Date of approval:	2016-11-14
Changed:	2020-04-01
Department	Stockholm Business School
Main field:	Advertising and Public Relations
Specialisation:	G1F - First cycle, has less than 60 credits in first-cycle course/s as entry requirements

Decision

This syllabus was approved by the Education Committee at Stockholm Business School, Stockholm University, November 14, 2016. The last revision was approved by the Head of Department, Stockholm Business School on April 1, 2020.

Prerequisites and special admittance requirements

15 HE credits from Advertising and PR I, or the equivalent.

Course structure

Examination code	Name	Higher Education Credits
2543	Consumption, Culture and Commerce	7.5

Course content

This course aims to introduce students to the intricate ways in which various market actors influence consumers' daily lives around the world. The course thus focuses on the intersection of consumption, culture and commerce.

The overall goal of the course is to provide students with the necessary theoretical tools to be able to decipher global consumer cultures. In this context, consumer culture should be understood as a social arrangement in which the relations between lived culture and social resources, and between meaningful ways of life and the symbolic and material resources on which they depend, are mediated through markets.

The course takes a critical perspective to address the broader role of marketing communication in society. Questions about the responsibility of individuals/companies when using marketing communication knowledge and techniques to influence consumers are brought into focus.

Possible topics may include:

- Marketing theory and marketing communication practice
- The paradigms debate
- Marketing as ideology
- Consumption as an identity tool
- Consumer resistance
- Globalisation

Learning outcomes

The overall aim of the course is to introduce students to a theoretical framework for analysing the intersection of consumption, culture and commerce.

Upon completion of the course, students should be able to:

Knowledge and understanding

1. Describe and compare theories and central concepts about consumer culture.

Skills and abilities

2. apply different theoretical approaches to understand consumption in various cultural settings;
3. reflect upon, argue for and persuade about your position with regards to consumer culture;

Judgement and approach

4. analyze consumer culture as an ideological framework for understanding how companies, consumers and other stakeholders co-produce the meanings of commercial symbols;
5. critically reflect about the role of marketing communications in consumer culture and the responsibilities of those who engage in marketing communication.

Education

The course consists of a combination of lectures, seminars and group work and requires a significant portion of self-study on the part of students. Assessment for the course will be continuous and is carried throughout the different activities of the course.

The course workload is 200 hours equivalent to 7,5 ECTS.

Please note that all teaching and learning activities - such as lectures, seminars, assignments and assessment tasks – are carried out in English when the language of instruction is English.

Forms of examination

Assessment for the course will be continuous and is carried throughout the different course activities. Each assessment task is weighted in relation to its importance in the overall assessment of the course. The student's results from the different assessment tasks are added up to a total course score that will then translate into the final grade for the course.

Assessment tasks

The course contains the following weighted assessment tasks:

1. Individual final examination: assesses intended learning outcomes 1, 2, 3, 4, 5 constitutes 60% of total course points.
2. Assessment task 2: group project and presentation, assesses intended learning outcomes 1, 2, 3, constitutes 30% of total course points.
3. Assessment task 3, attendance and participation: assesses intended learning outcomes 2, 3, 4; constitutes 10% of total course points.

Grading

After completion of the course, students will receive grades on a scale related to the intended learning outcomes of the course. Passing grades are A, B, C, D and E. Failing grades are Fx and F. A grade Fx can be completed for a grade E.

A course comprises 0–100 course points. Receiving a final passing grade requires at least 50 course points. The scale for the final grade is tied to fixed score intervals: A: 90-100; B: 80-89; C: 70-79; D: 60-69; E: 50-59; Fx: 45-49; F: less than 45. The grades correspond to the total score points a student obtains (over a total of 100) for all the weighted assessment tasks combined as part of the continuous assessment for the course. Each assessment task is awarded 0–100 points. The score for a single assessment task is the number of points multiplied by its percentage weight, and the combined total of score points for all weighted assessment tasks

for the course are added up to a final score between 0 and 100 which then translates into a corresponding final course grade between A and F.

Assessment tasks 1-3 are assessed on a 100-point scale. See Study Guide for a detailed description.

The student is responsible for completing the course's assessment tasks: that a sufficient amount of course points is earned and a passing course grade is obtained. The course's final assessment task can be taken twice: 1) during the course's first scheduled occasion; and, if a passing result (at least 50 course points) was not achieved at the first occasion, 2) at the course's second, scheduled occasion. All other assessment tasks are offered once during the course.

A passing grade (A–E) in the course is obtained when a student has achieved at least 50 course points.

A failing grade (Fx or F) in the course is obtained when a student has not achieved at least 50 course points:

- If 45–49 course points are achieved, a grade Fx is obtained, which can be completed for a grade E within 3 semester weeks after receiving instructions from the course director. If a complementary task is not completed within this time limit, and the course's two final assessment tasks have been accomplished, the course grade Fx is confirmed, implying that the student must re-register for the course and that previously acquired course points are forfeited. Note that first-time registered students have priority access to the seminar groups.
- If less than 45 course points are achieved, a grade F is obtained, implying that the entire course must be retaken and that previously acquired course points are forfeited.

Re-registration implies that:

- first-time registered students have priority access to the course's group registration;
- the final assessment task can be re-assessed without attendance at any of the course's other learning activities and without points from the course's other assessment tasks accredited.

Students receiving a passing grade may not retake the final examination or complete a previously not completed assessment task to attain a higher grade. A passing grade may not be turned into a failing grade upon the request of a student.

Assessment criteria

Assessment criteria are designed as overall assessments, combined qualitative descriptions of what the student is expected to do in order to demonstrate how well the course's learning outcomes are achieved. The assessment criteria are based upon the general abilities as expressed in the degree objectives of the Higher Education Ordinance (appendix 2, System of Qualifications).

The list of abilities below is a compilation of these degree objectives. To pass the course (grade E) students should demonstrate general ability to:

- recall, understand and explain course content, the course subject and its scientific basis and methodology;
- apply course content;
- critically analyse course content;
- orally and in writing, present and discuss course content;
- meet standards of written presentation and formal accuracy.

The following assessment criteria are used to decide to what extent students have demonstrated these abilities and hence fulfil the course's intended learning outcomes, whereby a grading decision can be made. A higher grade-level presupposes the abilities at lower levels.

A (Excellent)

The student demonstrates ability to evaluate and relate to the content of the course from a comprehensive, critically reflective perspective, as well as to transfer and apply insights in new, meaningful contexts.

B (Very Good)

The student demonstrates ability to, from an overarching and coherent perspective of the field, understand and use concepts to explain how different aspects of the course relate to each other, interconnect and become meaningful.

C (Good)

The student demonstrates ability to discuss the content, tasks and complex issues dealt with in the course from several well-developed but mainly independent perspectives.

D (Satisfactory)

The student demonstrates satisfactory ability to discuss the content, tasks and complex issues dealt with in the course in a way that, albeit in-depth and elaborate, is decidedly one-dimensional.

E (Sufficient)

The student demonstrates sufficient ability to discuss the content, tasks and complex issues dealt with in the course in a way that is decidedly one-dimensional.

Fx (Fail)

The student's knowledge, skills and abilities display minor flaws, overall or in significant parts.

F (Fail)

The student's knowledge, skills and abilities display major flaws, overall or in significant parts.

Interim

If the course is discontinued, or its contents are substantially altered, students have the right to be examined according to this syllabus once per semester for three further semesters.

Limitations

This course may not be included in a degree together with a course, taken in Sweden or elsewhere, of identical or partially similar content.

Misc

Exemption from an assessment task is granted if the student presents a valid reason and a written certification (such as illness and a medical certificate), whereupon the student may re-sit the assessment task at a later date while maintaining previously acquired course points.

Application for exemption should be submitted to the Director of Studies immediately after, or during planned absences well before, the date when the assessment task is carried out. A granted exemption expires at the end of the immediately following semester.

Required reading**Required Reading**

- Hartmann, Benjamin, Jacob Östberg, Anders Parment and Cecilia Solér (2020) Unboxing Marketing: Creating Value for Consumers, Firms, and Society, Lund: Studentlitteratur.
- The students are also offered a course compendium which include parts of the required reading.
- A list of the articles is selected for each run of the course and will be available via Stockholm University Library's website.
